About US

Amirco Universal Concept Ltd is a renewable Energy and Energy efficiency company, specialized in developing, supplying, designing and installing solar PV plants, solar water heating, energy efficiency systems, solar lighting, LED lighting, solar water pumping, sustainable electrical and mechanical designs and contracting.

We offer custom made solutions using appropriate technology for various types of projects, governmental, industrial and telecommunication as well as the conservation of the environment.

Amirco Universal Concept Ltd was incorporated in January 2011, and has since then designed and installed hundreds of photovoltaic generators for different type of sites. Tasks accomplished include:- Installed more than 7MW of PV Power Plants- Implementation of off grid, on grid, and grid interactive systems Designed and installed more than 300 solar telecom sites.- Finalized more than 150 energy audits- Implemented over 100 solar thermal water heating systems Installed thousands of LED lights and over 1500 solar street lights.

Our corporate values and engineering skills enabled us to complete solar designs all over Lebanon as well as supplied power systems for new and renewable energy solutions to Zambia, Saudi Arabia and Lebanon.

Amirco Universal Concept Ltd is extremely active in the Lebanese markets and has been instrumental in the availability of affordable electricity in cities and rural communities with impact on health, education, security and income generation. Other benefits derived from our renewal energy efforts include: alleviate electricity challenges and outages, lower utility rates, reduction of culture shock between people in the city and the rural areas, provision of clean water, lighting, refrigeration, communications, employment and commerce.

Introduction & Official Documents

Committed to Transparency, Technology and Teamwork.

In pursuing the highest performance and being a business of first choice, we continually innovate. We conduct our business in an open manner. Our strongest assets are our people and their ability to lead by example. That is why **Amirco Universal Concept Ltd** will continue to apply ingenuity to project management.

As a proficient contractor, we recognize that improvements can be continually made. We also understand the changing nature of the industry and we are continually planning to adopt and benefit from these changes. We embrace ethical behaviour and we are determined to maintain our reputation as a trusted civil contractor.

As we deliver projects, workplace, health and safety is a top priority. The protection of the natural environment is also of the utmost importance. We recognize that consulting with the community about projects is also critical. Innovation, teamwork, trust, and workplace enjoyment are the defining qualities of our company operations.

As the Managing Director of **Amirco Universal Concept Ltd**, I want the company and our staff to be recognized for their conduct towards each other, the community and other stakeholders.

Strict Quality means Projects are Completed on time, within Budget and to Specification

Our aim is to provide the qualified expertise, experience and capability to complete projects on time, within budget and to specification. We recognize that a complete commitment to quality from beginning to end is the key to meeting this objective.

To this end, trained and experienced systems management representatives constantly undertake internal audits. A policy of continuous improvement has led us to implement new processes and controls to improve our operations.

5 Five Key Values

Safety:

Amirco Universal Concept Ltd recognizes the paramount importance of ensuring a healthy safe and accident free workplace for all our employees, clients subcontractors and visitors.

Visitors:

Amirco Universal Concept Ltd provides the technical expertise to deliver excellence in Electricity generation , solar for households, solar companies and street light.

Sustainability:

By undertaking all our civil projects in a manner that ensures the protection of the natural and artificial environment, we demonstrate our commitment to being an ethical and environmentally conscious team work.

Innovation:

In applying ingenuity, innovation and adaptability, we ensure our client's needs are met and their expectations exceeded.

People:

By creating a workplace of sharing responsibility, our employees are recognized for their initiative, professionalism, teamwork and the trust they engender in our customers, clients, subcontractors, and community

Strategic Alignments

Healthy Sun

The World Health Organization Health Resources and Services Availability Monitoring System (HERAMS) standard aims to ensure that core information on essential health resources and services is readily available to decision-makers at country, regional, and global levels.

Amirco Universal Concept Ltd provides the platform for actualizing HERAMS by not only providing power to rural, peri-urban, and urban primary and secondary healthcare centers across states and Local Government Areas in Nigeria but also providing the digital application structure upon which requisite data inbuilt and operated.

Amirco Universal Concept Ltd adheres to EU standards in all its installations, enabling us to work with UNICEF projects across the country.

Our commitment to high quality standards also qualifies us to collaborate with units of various international and local organizations.

"Amirco Universal Concept Ltd Adheres to EU Standards"

Lightwave

Starting with well-lit streets across our various city centers and towards the interiors. Setting the stage for deployment of city-wide CCTV camera coverage to encourage proactive security surveillance system in select parts of the various states and parts of the country. With the infused PPP-type implementation and funding DIC takes away the traditional financial burden commonly associated with projects like this and opens up new

EnLightened Minds

The EnLightened Minds program is a solution aimed at transforming the learning and teaching experiences of students, pupils and teachers in schools located at rural and general areas where there is no electricity supply.

The ultimate end is to push needle right wards in the area of national and regional exam results these students and pupils participate by igniting the genius in the them It is known that schools without electricity don't have motivated teachers and student population who often have to abandon lectures for reasons as weak as poor lighting during cloudy periods and evenings. Teachers are faced with uncondusive – poorly lit and unventilated classrooms and offices.

Energy Management

Our capacity scope of power plant and energy management services cover a range of activities and offerings as shown below

1. Power Plant Services – Environmental compliance and emissions control
2. Energy Management Services –Energy audits and assessments to identify opportunities for efficiency improvements; Development and implementation of energy management plans; Integration of renewable energy sources into the energy mix; Energy storage solutions.

These services aim to provide reliable, efficient, and sustainable energy solutions while optimizing energy consumption, reducing costs, and mitigating environmental impact. Our scopes build in the specific needs and goals of our clients.

Sustainable Living For Community

We work on a full range of modern, eco-friendly residential complexes, aiming to provide sustainable and affordable living for their residents. Amirco Universal Concept Ltd was selected to design and install high efficiency solar panels across 50+ residential units, reducing reliance on grid electricity and lowering household energy costs while supporting a greener environment.

Execution

- To ensure maximum efficiency and saving, **Amirco Universal Concept Ltd** implements the following steps:
- **Custom Energy Assessment** – Evaluated each home's energy needs and solar potential.
- **High-Efficiency Solar Panel Installation** – Installed premium monocrystalline solar panels for optimal energy generation.
- **Smart Solar Monitoring System** – Integrated real-time energy tracking for homeowner.
- **Net Metering Integration** – Enabled excess energy to be fed back into the grid for additional saving.
- **Battery Storage Options** – Provide residents with an optional solar battery system for energy backup.

Result

- 60% Reduction in monthly electricity for residents.
- Over 500 tons of CO2 emissions prevented annually.
- Smart Solar Monitoring System – Integrated real time energy tracking for home owners.
- Sustainable Living Enhanced – Contributing to build eco-friendly community.
- Higher Property Value – Homes equipped with solar panels saw an increase in resale value.

“Amirco Universal Concept Ltd has transformed our community into a model for sustainable living. Our residents are thrilled with the significant cost saving and the positive environment impact. The team was professional, and the installation was seamless. We couldn't be happier with the results!”

*Ms. S. Abu Baker
Managing Director*

My Home Energy

Amirco Universal Concept Ltd offers you the no-stress solar package. With a comprehensive portfolio of thoroughly tested components, comprehensive system planning and services such as the combination warranty. All from a single source and of the highest quality. With a direct point of contact for you: Your local specialist partner. While your new solar power system is busy producing electricity, you can focus on what really matters – Your Life.

Don't Pay For Electricity. Make Your Own.

What a bright idea! In many countries, solar power is already around three-quarters cheaper than conventional main electricity. Generating and using your own solar power can reduce your electricity bill by at least 30%. Use an additional solar energy storage system and you can lower your electricity costs further, by up to 80%.

It's a very simple principle: Solar energy is generated during the day and stored for use at night. If you produce more electricity than you need, you can even profit from it too.

Be independent, save money and preserve the environment.

My Electricity. My independence.

The best way to combat unpredictable electricity prices – generate your own electricity. In combination with a solar energy storage system, a solar installation enables you to be up to 80 % self-sufficient at an economically viable cost. Favourable electricity prices, full predictability and a high degree of independence. Have sun!

My electricity costs melt away in the sun.

Self-consumed solar power is not only sustainable, but also cheaper than conventional grid electricity. The higher the proportion of self-generated electricity, the greater the savings. With a combination of an energy management system and solar power storage, you can utilise the full potential.

Saving money. But not at the expense of the environment.

With **Amirco Universal Concept Ltd**, your electricity costs will melt away in the sun. Good for the environment, good for your wallet. If you use the solar power from an **Amirco Universal Concept** complete photovoltaic system, it's not only sustainable, but also three times cheaper than conventional grid electricity. You don't need a calculator to realise that the more of your own electricity you use, the more you save. With your **Amirco Universal Concept Ltd** photovoltaic system, this is easy to achieve if you use a combination of an energy management system. Heavy consumers such as cooling systems, electric cars and pump machines are operated in a targeted manner when a lot of favourable solar power is available. If the solar system generates a surplus, this is either stored for later. Or you can have it fed into the grid for a fixed feed-in tariff.

Turn Your Roof Into A Source Of Revenue.

Photovoltaics for companies – one of the best business decisions.

As your partner, we want you to be able to focus completely on what really matters: your business. That's why we help you achieve long-term planning security for your electricity costs and significantly reduce your operating costs. With our highly efficient photovoltaics for business, you not only tap into a low-cost energy source that will remain stable in price for decades, but you also increase your competitiveness in a sustainable way. Making solar fun. Have sun!

Reduce operating costs.

Self-generated solar power will have your operating costs plummet in no time. That's because it is currently around five times cheaper than conventional electricity in the commercial sector. The more solar power you consume for your business, the more independent you become and the more you save on electricity procurement costs. What's more, you have a fixed electricity price that remains constant in your operating costs for decades. This helps you plan for the long term. After calculating the costs for the system, the electricity price per kilowatt hour is fixed over the entire service life. So choose solar power and be on the safe side when it comes to electricity cost planning.

Our company installed the Largest Hybrid Power Bank in Minna / Nigeria – and possibly in all of Africa – designed entirely off-grid to support mega-scale operations.

This is a bolt step toward energy independence and sustainable governance in Niger State. The pilot phase of the solar power generation project, implement by **Amirco Universal Concept Ltd** at the Government House in Minna, has officially begun.

This initiative is the key component of **Governor Umaru Bago's green agenda**, aimed at reducing reliance on the national grid, cutting energy costs, and promoting cleaner, more resilient infrastructure across the state.

The solar installation features 1.2-kilowatt peak high-efficiency monocrystalline silicon panels and an impressive 3.6-megawatt hour battery storage system.

Fully deployed and operational for the past two months, the system now delivers stable, renewable energy to all buildings within the Government House complex.

This achievement marks a major milestone in Niger State's pursuit of energy self-sufficiency, providing uninterrupted power while enhancing administrative efficiency. It also reaffirms the government's dedication to environmental sustainability and forward-thinking public-sector innovation.

This pilot project is more than just a power solution—it's a prototype for a future where public facilities across Niger State are powered by sustainable, locally generated energy.

Meanwhile, the renovation and landscaping of the Government House, handled by CCECC, are progressing steadily.

Work includes refreshing the front façade of administrative buildings, realigning roads, enhancing surrounding landscapes, and constructing a new security post. These upgrades are improving not only the aesthetics of the Government House but also its security, accessibility, and operational efficiency, creating a more functional seat of power.

An investment that pays off.

There's no question that a solar energy system is a major investment for everyone. But when you do the maths, it quickly becomes clear that you are securing enormous savings potential in the long term: In the most countries solar power is at least three or four times cheaper than conventional electricity from a power socket, and using self-generated solar power reduces your electricity bill by at least 30%. With an additional solar energy storage system, you can become even more independent of the electricity price, by up to 80%. Add to this a green electricity tariff and you are 100% independent of fossil fuels. Another good thing about buying a photovoltaic system is that the large savings on the electricity make it easy to finance. Once this has been finalised, the cost savings are enormous. And for a very long time, because quality modules from **Amirco Universal Concept Ltd** work reliably even beyond the warranty period between 5 and more than 20 years.

Solar power. A safe investment.

..We are partners for sustainable success in large-scale solar projects.

Solar parks are an excellent investment. They make a valuable contribution to a clean energy supply and generate high long-term returns – provided you do everything right. With us as your partner, you as an investor, local authority or private land provider can be sure that the solar park will operate on highly efficiency and with the greatest possible profitability. Because we offer the highest quality and decades of experience in planning and operation.
